**CUTTING COST AND
ELEVATING EFFECTIVENESS**

NEW

From Trevor . . .

Gynex was founded in 1997 with the mission of “offering the best products at better prices”. More than 20 years later we are still committed to that mission, diligently working to provide both new and time-tested quality instruments to your practice at a lower cost.

In this issue, you’ll find a number of new products that build on our mission, including the new SURESAMPLE® Select1, a better, more cost-effective endometrial suction curette. (Pages 44-45) We have also included the new Touch-Guard® Instrument Lubricant. If you have met us at any of the exhibitions we attend, you know the importance of lubricating your instruments to not only extend their life, but their effectiveness. Please see page 96 to see all the benefits of this product. We believe this is the best instrument lubricant on the market.

Lastly, we understand that the healthcare industry is navigating uncharted waters right now. The products we’ve added to this catalog were inspired through focus on safety and affordability. As a convenience, we have added the new Touch-Guard® Infrared Thermometer, a necessity for any business, which can be found on page 22.

As always, please feel free to contact us should you have any questions, thoughts, or ideas, so we may accommodate you.

I wish you a healthy and successful 2020!

Thank you,

Trevor Kurz

Monseľ's Ferric Sub sulfate Solution, Single-Use ②

Helps to control bleeding during biopsy, LLETZ and laser procedures

- Pre-thickened for easy application
- Box of 12 single-use ② 8ml vials
- Includes 12 applicator swabs
- Convenient for use

REF 5055

Box of 12\$179⁹⁵

NOTE: A pharmacy or a physician's license is required when ordering this product.

Acetic Acid 5%, Single-Use ②

Helps enhance the appearance of abnormal areas

- Pre-measured for easy application
- Box of 12 single-use ② 12ml vials
- Includes 12 applicator swabs
- Convenient for use

REF AA312

Box of 12\$84⁹⁵

Colposcopes with Direct-Access™

- Features no blockage from center post
- Easier access for instruments
- Improved accuracy and control
- Available with integrated video camera for optional monitor or PC.
- German optics
- Clean elegant design
- Exceptional clarity
- Single and Three-step magnification models available
- LED light source
- Tilt or rolling base
- Now with Right-handed and Left-handed models.

Access with a standard colposcope.

The Direct-Access™ is now available for left-handed physicians too.

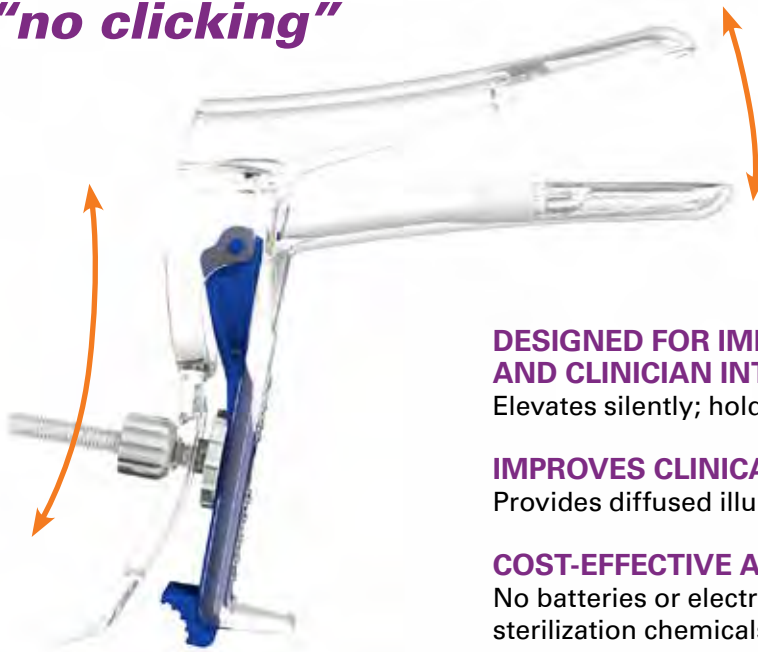

The Direct-Access™ advantage with a Galileo® Colposcope

SpecuLume® EZ

Single-Use ☒ Vaginal Speculum with Illumination Insert

Finally, a single-use vaginal speculum that provides true intravaginal lighting, greater clinician visibility, and increased patient comfort. The functionality of the sturdy, classic metal speculum combined with the benefits of modern designs make it silent to operate, disposable, and affordable to any budget.

***Slides up and open just like a Graves speculum!
“no clicking”***

MADE IN THE USA

Illumination Insert

DESIGNED FOR IMPROVED PATIENT AND CLINICIAN INTERACTION

Elevates silently; holds securely; releases easily

IMPROVES CLINICAL PERFORMANCE

Provides diffused illumination positioned where needed most

COST-EFFECTIVE AND ENVIRONMENTALLY FRIENDLY

No batteries or electricity needed; no costly cleaning or sterilization chemicals

EASY-TO-USE, STURDY DESIGN

Operates like traditional metal, Graves speculum; disposable like plastic

With SpecuLume® EZ

- Unique light source generates no heat.
- Light insert ready in a “snap” without requiring electricity or batteries.
- After use, discard the entire product as clinical waste; nothing to disassemble, because there is no battery.
- Single middle bolt design allows for simple operation and securely locks in place.
- Completely recyclable and more environmentally friendly than battery-powered devices.
- Chemiluminescent insert produces optimal distributed lighting for 15 minutes, eliminating harsh illumination.

ILLUMINATED VAGINAL SPECULUM

Single-Use ② Vaginal Speculum with Illumination Insert

*“Finally a disposable speculum
that makes sense”*

CHEMILUMINE SCENCE

Light insert can be placed on either upper or lower blade. Allows flexibility for optimal bright illumination

LARGER OPENING

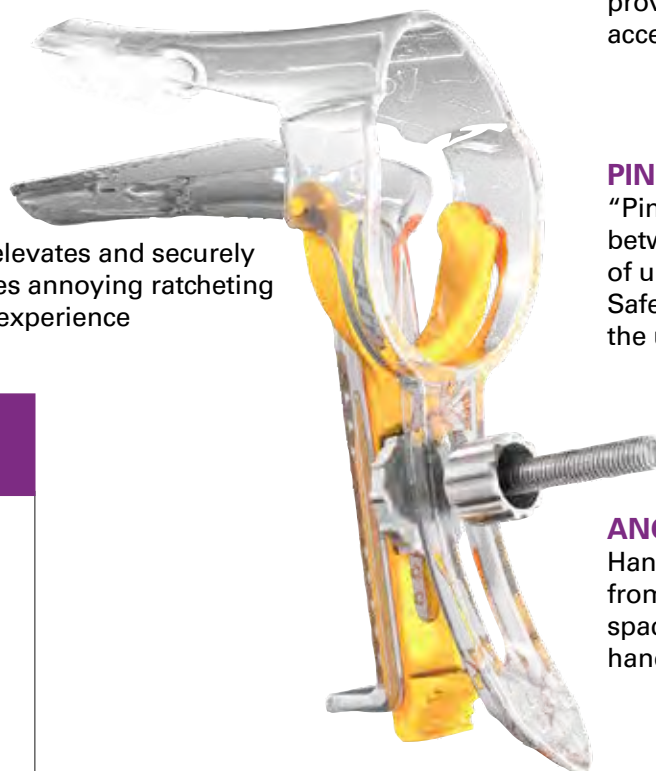

Large user opening provides greater visual access, 42mm x65mm

SILENT ADJUSTMENT

Single middle bolt silently elevates and securely locks upper blade. Eliminates annoying ratcheting noise for improved patient experience

PINCH GUARDS

“Pinch Guards” block the gap between the proximal ends of upper and lower blades. Safeguards the patient when the upper blade is lowered

ANGLED HANDLE

Handles are angled away from patient. Provides more space between clinician's hands and patient

Tischler Biopsy Punches

The Best Selling Design in the World

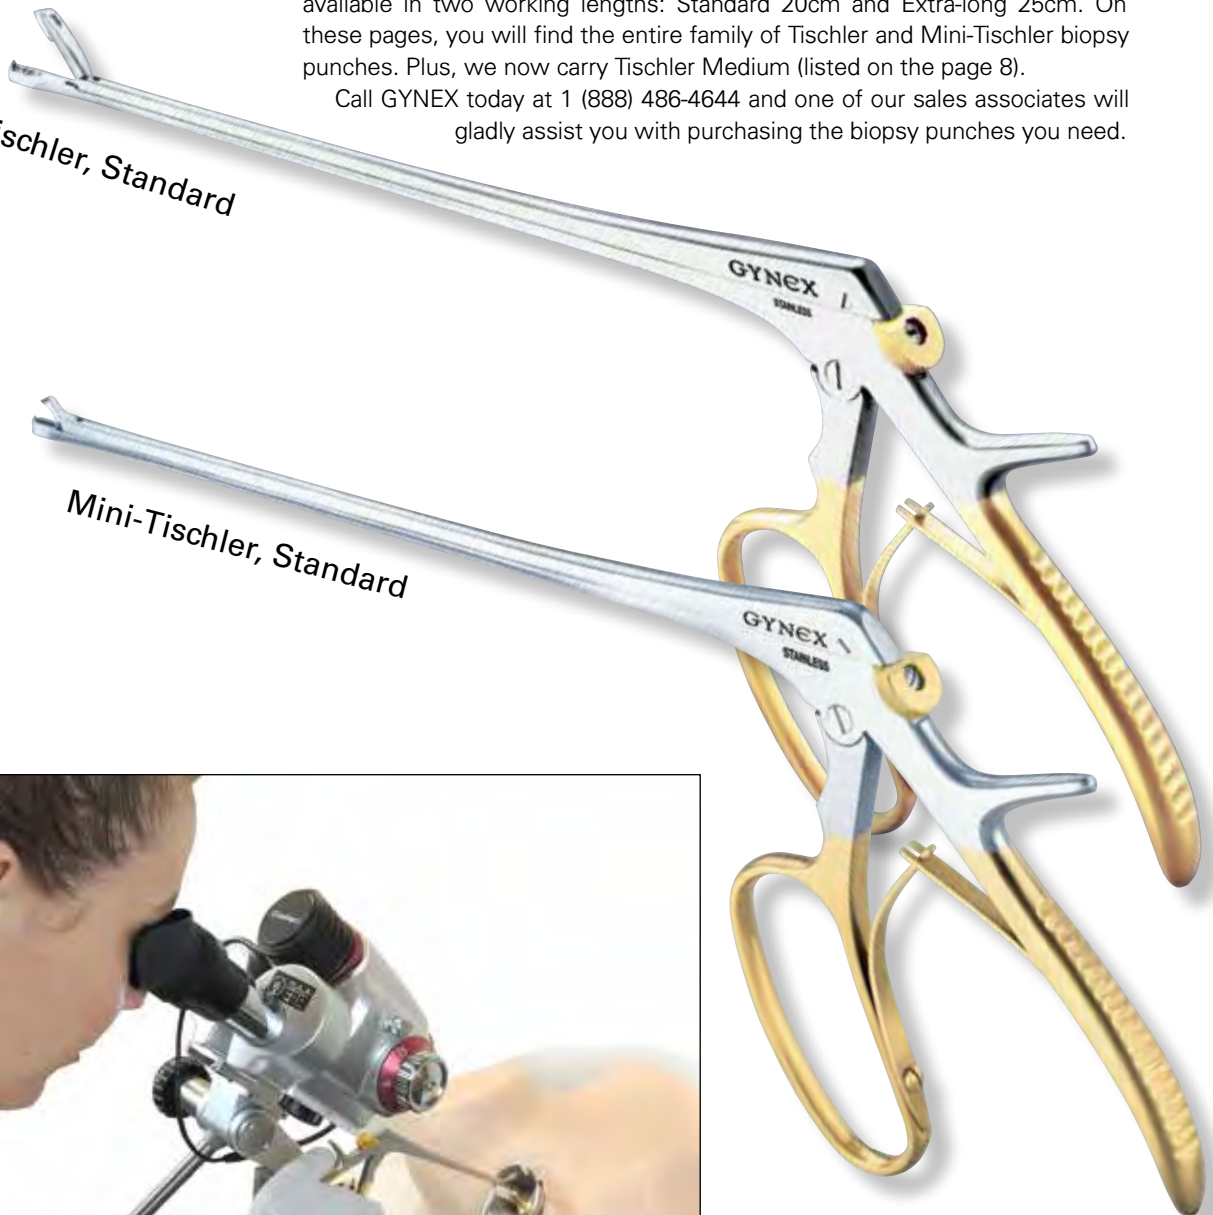

GYNEX
Original!

Invented by GYNEX President Stephen J. Sullivan, the modern Tischler biopsy punch is the #1 selling design worldwide. The Tischler and Mini-Tischler are available in two working lengths: Standard 20cm and Extra-long 25cm. On these pages, you will find the entire family of Tischler and Mini-Tischler biopsy punches. Plus, we now carry Tischler Medium (listed on the page 8).

Call GYNEX today at 1 (888) 486-4644 and one of our sales associates will gladly assist you with purchasing the biopsy punches you need.

ROTO TIP™ Rotating Biopsy Punches

ROTO Tip™ rotating biopsy punches offer the added convenience of making a quick change in the biopsy tip size and shape without the expense of having additional complete biopsy punches. With a single handle you can have several tips available. Although the Standard Tip Tischler and the Mini-Tischler are the most popular, this design provide you a cost savings option to add angled tips. See our list of other tips on the next page. Plus these tips easily rotate allowing you to gain better poistioning for a biopsy sample.

- Shaft/tip can be rotated up to 360° then locked
- Shaft/tip assembly is interchangeable
- Lower cost alternative to individual biopsy punches
- Working length 21cm

Endocervical Curettes

Dr. Gordon M Lickrish, past director of the colposcopy unit at the University Health Network in Toronto has developed this unique endocervical spiral curette. It has a dual purpose. First it supplies curettage where the endocervical canal is narrow, and a normal curette cannot sample. Second, it acts as a cervical dilator allowing cervical or endometrial sampling. This instrument is found to be most appropriate when there is complete or severe partial cervical stenosis. This allows tissue sampling when a standard curette is too large for insertion. The tip may be gently inserted through the os, advancing and rotating at the same time.

Colposcopy Sets

Build Your Own Colposcopy Set

Choose ONE item from each of the five lists
on the next page

Each *GYNEX Colposcopy Set* consists of five instruments essential for colposcopy procedures:

- *Biopsy punch*
- *Endocervical speculum*
- *Vaginal speculum*
- *Endocervical curette*
- *Tissue hook*

To order, choose one item from each of the five lists, and specify that you are ordering a *GYNEX Colposcopy Set*.

Priced at \$675, the GYNEX Five Instrument Colposcopy Set saves you a bundle! Industry standard price for a competitor's "Colposcopy Kit" is \$765 for only four instruments!

Since all GYNEX instruments are already priced lower than comparable instruments available at industry standard prices, you save substantially with a *GYNEX Colposcopy Set*.

\$675⁰⁰ Per Set!

Note: All sets MUST consist of one item from each of the five lists of instruments shown.
No substitutions allowed.

***This discount cannot be combined with any other discount offers
such as 5% prepaid discounts, etc. .***

IUD SPECIALTY SECTION

see the following pages 28-31

Serpentine Grasper IUD Remover

The Serpentine Grasper has a flexible shaft that can be shaped into the most convenient, comfortable and advantageous position for entering the uterine cavity.

The shaft can be bent greater than 360 without the loss of function, it will remain in any desired angle until reshaped as needed.

The small tip allows easy entry into the endocervical canal while the grasping teeth provide a secure grip, especially useful for grasping IUD's.

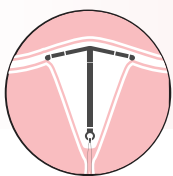

Serpentine Grasper IUD Remover

- Flexible shaft offers over 360° of mobility.
- Shaft holds desired position until reshaped.
- Small tip provides easy access.
- High quality Stainless steel
- Tip in closed position 4.5mm
- Working length 20cm

ASCONA™ IUD String Snare

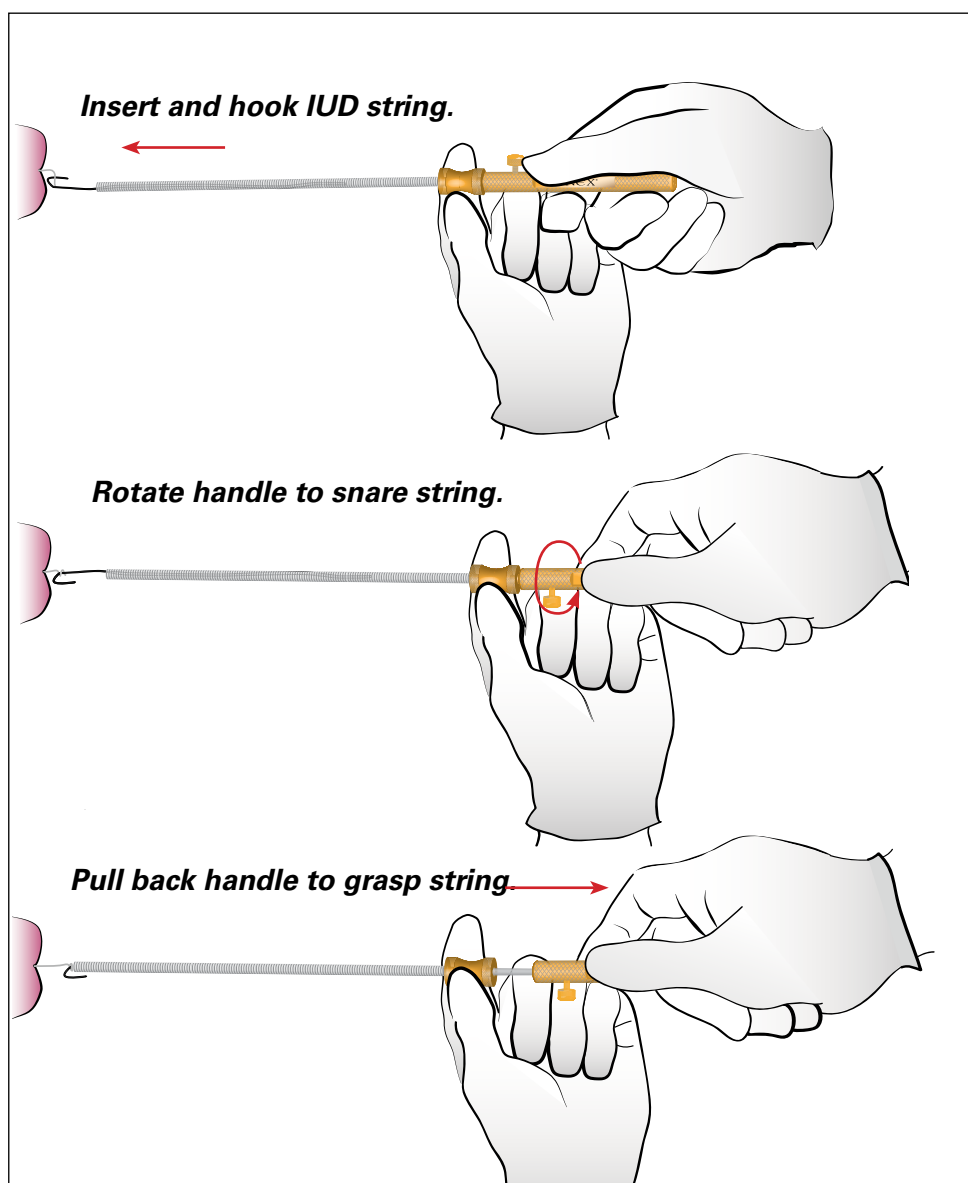

NEW

Gynex is proud to introduce this unique Ascona™ IUD string snare. The Ascona™ is used to overcome the challenge of grabbing a difficult to access IUD string.

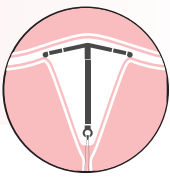

In the illustrations at the right you'll see how the device can be used to reach the cervix and hook the string. The easy to rotate handle provides a way to snag the string in the hook tip. Pulling back on the handle secures the string at the tip. Once secured, the Ascona™ allows the user to gently pull out and remove the IUD

Gynex® IUD Insertion Kit

Gynex® takes pride in bringing innovative new products to the Ob/Gyn community. This convenient, sterile IUD Kit is just one of our most recent innovations. All the best instruments and items necessary for an easy IUD insertion are contained in this handy tray.

Enclosed the user will find one sterile drape to layout all the items on, one Accusound® uterine sound, one tenaculum for cervix stabilization, two cotton swabs, and one pair of our popular IUD string scissors.

All items are sterile and ready to use, then disposed of. Eliminating costly instrument sterilization.

Dilating Tip

ACCU-SOUND®
uterine sound
w/measure ring

There's no reason to rely on guesswork when you measure with a sound. The simple yet ingenious design of the ACCU-SOUND® Uterine Sound eliminates the guesswork involved with a standard uterine sound. When the ACCU-SOUND® Uterine Sound is inserted into the uterus, a ring comes to rest against the outside of the Os.

The ring stays in place on the ACCU-SOUND® when the device is withdrawn from the uterus and vagina, clearly indicating the uterine measurement. There has never been a uterine sound more accurate and easy to use.

An accurate measurement as easy as 1, 2, 3!

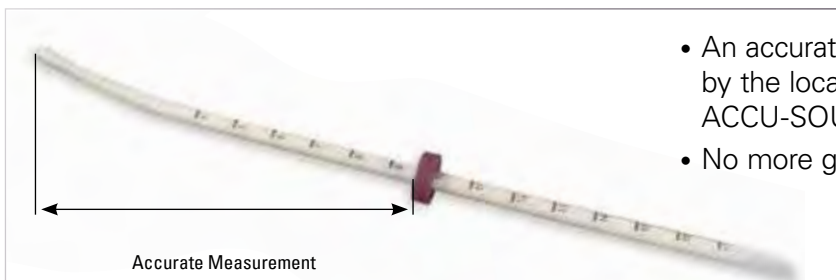

- Gently insert ACCU-SOUND® uterine sound's dilating tip into the cervical Os.

- Gently advance the ACCU-SOUND® uterine sound until the back of the uterus is felt.
- ACCU-SOUND uterine sound ring will rest against the outside of the cervical Os.

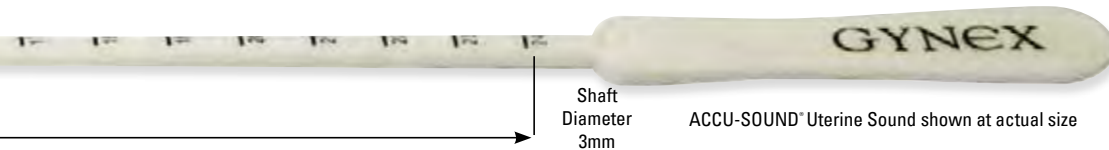

- Withdraw ACCU-SOUND® uterine sound from the uterus and vagina.

- An accurate measurement is indicated by the location of the ring on the ACCU-SOUND® uterine sound
- No more guesswork!

Ergonomic Handle

The ACCU-SOUND® uterine sound is useful for both surgical and non-surgical procedures:

- Dilatation and curettage
- Tubal patency studies
- Laparoscopic tubal occlusion
- Diagnosis of uterine position (antiflexed, retroflexed, mid-position)
- IUD insertion

The pHEM-ALERT® test measures vaginal pH and is intended for use by women who have any of the following vaginal symptoms: Itching, Burning, Unpleasant odor, Unusual discharge

This test may help decide if these symptoms are caused by an infection that may require follow-up by your healthcare provider. This test is only intended for women who have normal menstrual periods (periodic vaginal bleeding) or who may currently be pregnant. If you are pregnant, always discuss your symptoms and the result of this test with your healthcare provider and NEVER treat yourself.

Uterine Manipulator, Single-Use ②

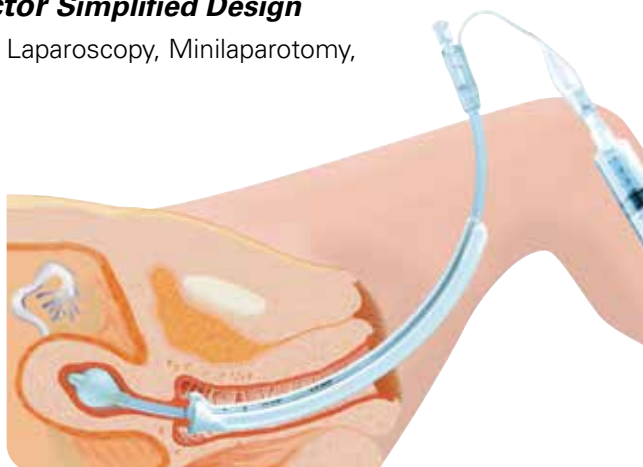

STERILE EO

Not made with natural rubber latex.

Century UMI Uterine Manipulator/Injector Simplified Design

Ideal for Laparoscopic Tubal Occlusion, Diagnostic Laparoscopy, Minilaparotomy, Salpingoplasty, Fertility Exams

- Flexible plastic insertion sleeve
- Sterile, single-use ②
- Flexible sleeve prevents luer fitting cracks
- Diameter 4.5mm
- Pear-shaped balloon for optimal hold
- Balloon forms an excellent seal at internal Os
- Incorporated cervical stop (no spring!)
- Reduced cannula to allow easy insertion
- Length 33cm

Note: It is highly recommended that the practitioner utilize a sound to determine the patient's uterine depth prior to using any uterine manipulator/injector.

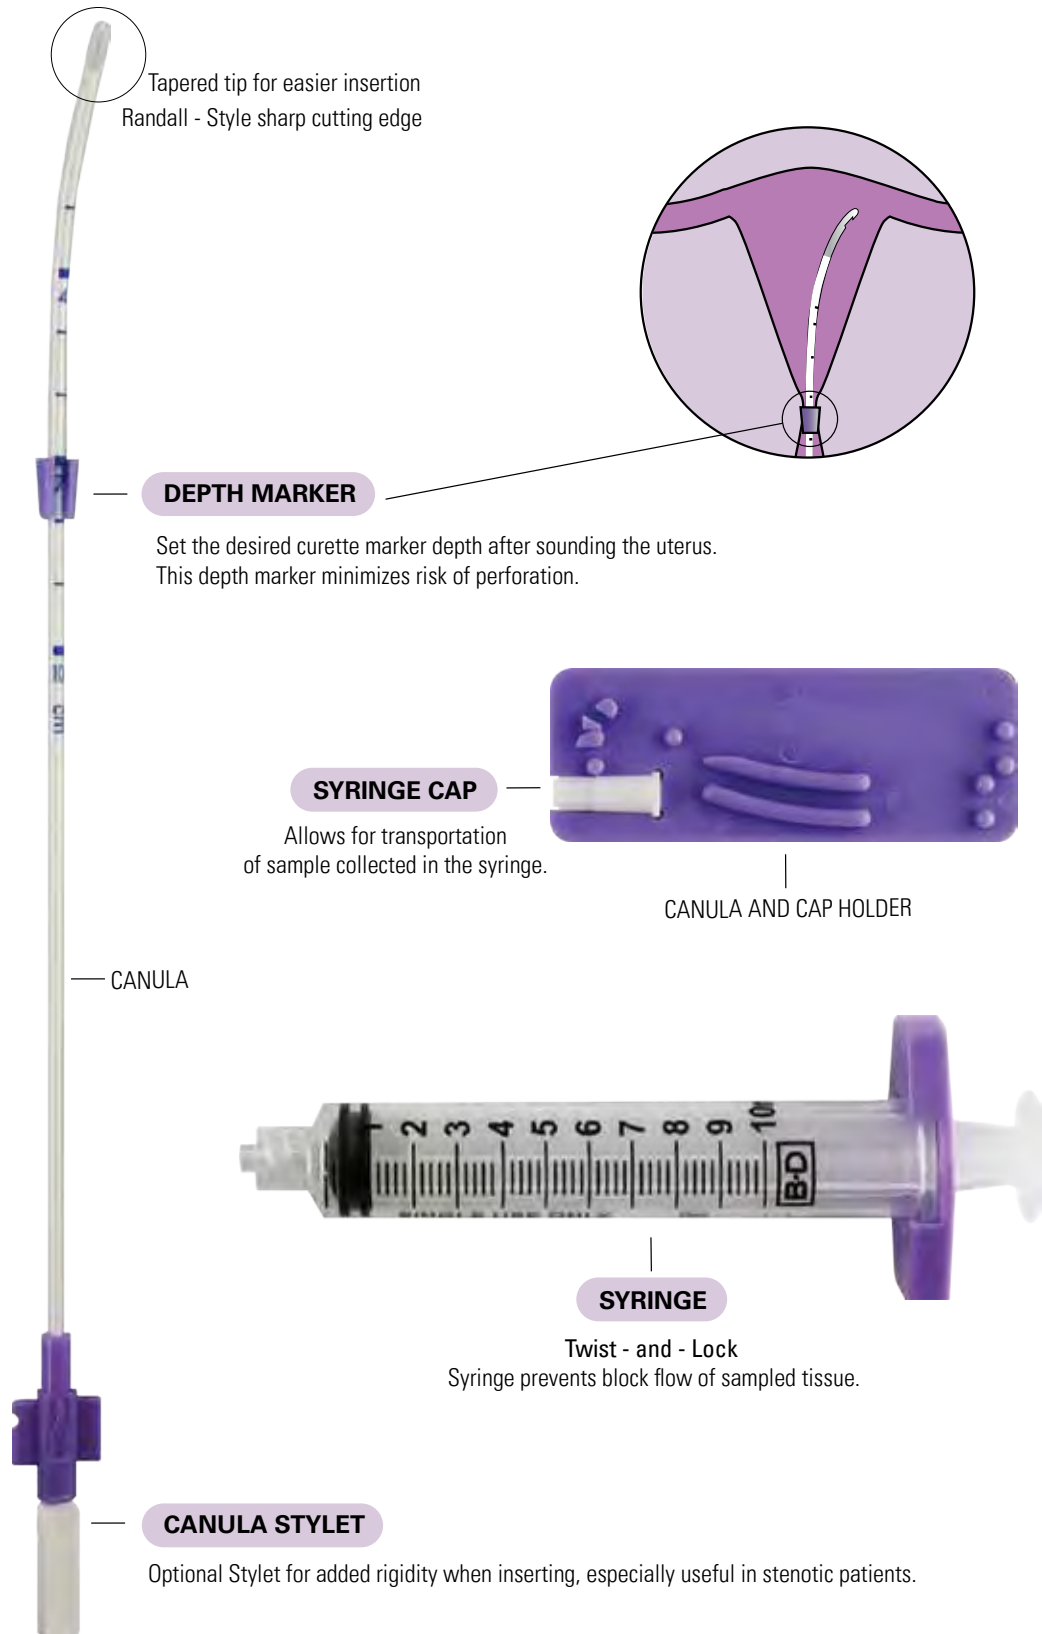

REF 10-160

Box of 12 **\$355⁹⁰**

sure@sample® • *Select 1*

Endometrial Curette, Single-Use ®

SURESAMPLE® Select1 is a unique, sterile, single-use curette for sampling the uterine endometrium. Ideal for obtaining samples from the uterus and mucosal lining by scraping or vacuum suction. Excellent for controlled insertion in patients where stenosis or atrophic endometrium is a concern. Collected samples are for the purpose of biopsy, pre-cancer screening or menstrual extraction.

Features

- Randall-style cutting edge curette
- Better grip and ease of attachment of curette to the syringe
- Clear marks every 1 cm to help monitor precise depth.
- Depth Marker provides protection against perforation of the uterine wall.
- Effective suction system for quick specimen collection in outpatient settings.
- Flexible design to enable smooth insertion and safe accommodation for uterine wall curvature.

Specification

- 10 ml Syringe with twist and lock plunger
- Luer Lock fitting with winged flanges
- Canula length 8-1/8" (20.5 cm)
- Not made with natural rubber latex
- Depth Marker
- OD 3mm

CUTTING COST AND ELEVATING EFFECTIVENESS

sure@sample®

Endometrial Sampler, Single-Use ®

An easy to use endometrial sampler—for less.
Less time and less money.

*3-port
sampling system*

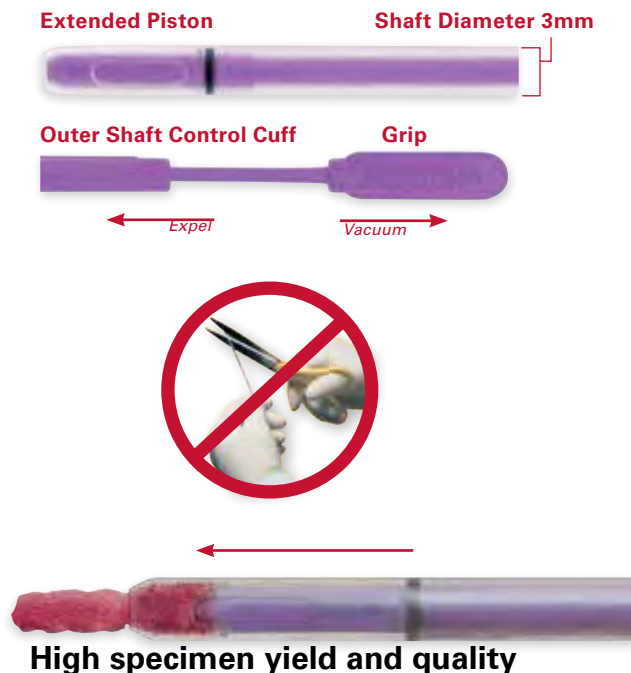

We believe that the SURESAMPLE endometrial sampler is one of the finest endometrial samplers available today!

Here are just a few reasons why:

- The SURESAMPLE endometrial sampler's **3-port sampling system doubles the harvested samples of other sampler devices.**
- The 3-port sampling system allows **easy sample retrieval with reduced cell damage.**

Key Features

- **3-Port Sampling System**—one port on each side of the distal end of the shaft and one on the tip end.
- **Grip retraction** creates a strong internal vacuum.
- **Two phase action** between the ports and grip produces a higher yield of tissue sample in an amazingly controlled manner.
- **Formable “memory”** shaft allows you to shape the sampler to meet each patient’s physical requirements.
- **Tensile strength and rigidity** allow conformity but also provide enough strength to fit through a smaller canal.
- **Small 3mm shaft diameter**
- **No cutting or splitting of tip** (a tedious process required by other widely used samplers that leads to damaged specimen).
- **Quick retrieval process**—simply push the SURESAMPLE endometrial sampler grip back, forcing the specimen out of the open sampler tip.

Better performance than other brands

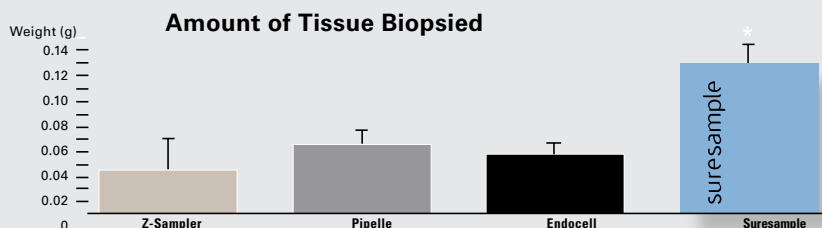

Figure 1. Mean amount of tissue biopsied by each endometrial biopsy device. (*=p,0.0001)

SURESAMPLE endometrial sampler retrieves more than TWICE the harvest of its competition!

the German • Red Dot concept design award

Galileo® Colposcope Direct-Access™ Extra Features

Because not everyone is right-handed, we have left-handed models available.

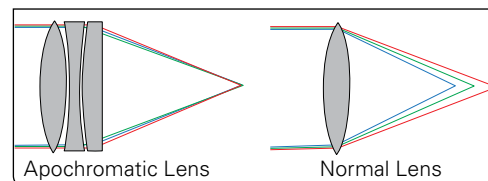

All Galileo® colposcopes are shipped as right-handed Direc-Access models. Because we are aware that many doctors are left-handed, we do offer a left-handed versions. In the illustration at the right, you can see how the left-handed configuration would look. It provides the same easier access that the right-handed models do, for left-handed access.

When ordering your colposcope, you will need to make sure you request a left-handed model to your customer service representative. Note the left-handed REF numbers when ordering. Otherwise all models in this catalog ship as right-handed models as the photos show. **All prices are the same for left-handed models as for right-handed models.**

Superb German Optics

- Multi-coated
- Handpolished
- Individually adjustable binocular optics for true stereoscopic view
- Optical measuring circles for precise measurements
- Apochromatic lens

Apochromatic lens uses 3 elements to direct red, green, and blue light to one point of focus. This minimizes secondary color and corrects chromatic aberration.

Measuring tissue when viewing through the colposcope

You will see two measuring circles through the lens. Since your Colposcope has up to three different magnifications, the measurement at the tissue site will vary according to the

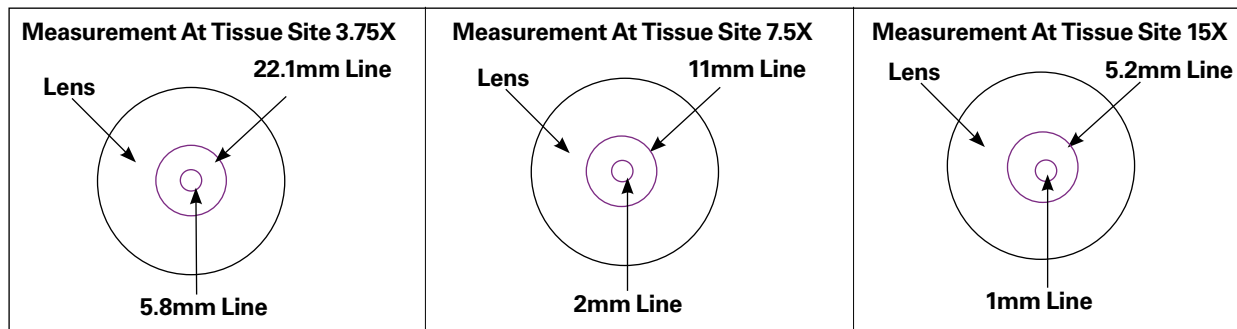

magnification you're using. This reference chart gives you the correct size per magnification change. Note: There is a small black chart on the right metal housing at the head.

**We believe that our LLETZ Electrodes
are the best on the market!**

Here are just a few reasons why:

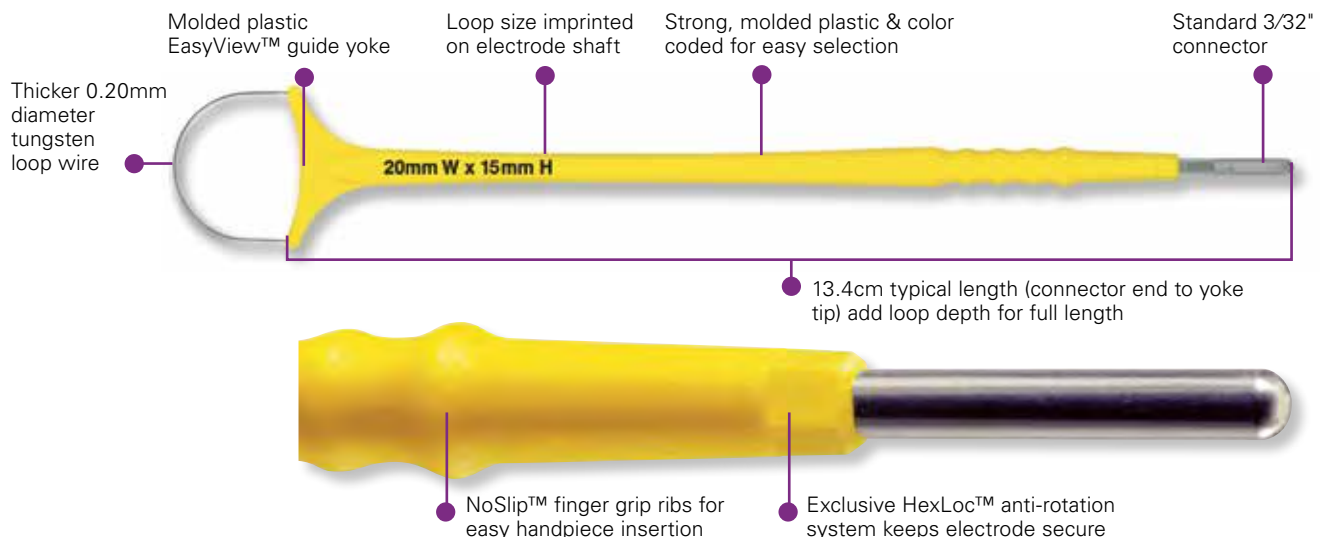

- Our molded handles provide security.
- Our loop wires are 0.20 mm thick to help reduce backward drag.
- Our HexLoc™ anti-rotation system at the bottom of the shaft keeps the handle from rotating.
- We package each electrode in a molded blister tray which keeps the tip true to shape and protects it from breakage.

Procedure Blister Trays

- Keeps tips true to shape
- Every electrode is sterilized
- Easy to open cover
- Procedure ready

- Provides 200 one second applications
- Includes 200 single-use® extension tubes

REF 0183 \$69⁹⁵

Sterilization Notice. Please read before ordering Gynex LLETZ coated instruments

We find that most autoclaves are default set at 270°. Gynex LLETZ coating must be autoclaved at 250°. Please lower autoclave setting to this temperature to avoid damage to the coating. Bubbling can occur at a higher temperature. This also voids the warranty on these coated instruments. Please use the following instructions:

- Use only distilled water in the autoclave.
- Assure that any towels the instruments are laid out on are free of residual soap, and are essentially pH neutral.
- Autoclave instruments constructed of like materials at the same time. E.g., autoclave only GYNEX LLETZ-Coated instruments together.
- The recommended sterilization cycle is **saturated steam at 250° for 25–30 minutes**. Use of this cycle will produce a Sterility Assurance Level (SAL) of at least 10⁻⁶.
- Do not allow instruments to touch each other during the autoclaving process, and assure that all instruments are **completely dry** when removed from the autoclave.

Sterrad Sterilization Systems, can be used for Gynex LLETZ coated instruments.

Sterrad 100NX system has been established by Advanced Sterilization Products as the testing model for material functionality, representing all Sterrad System models. This can be applied to Sterrad NX, 100S, 50 and 200 systems and will be at least equivalent.

Follow the manufacturer's instructions for operation and loading of sterilized items. Coating is compatible with at least 30 sterilization cycles with the 100NX System being the most challenging system on material functionality, although 60 cycles is the average compatibility. After 30 cycles surface bubbling may be visible, but this will not impact the functionality of the product. If cracking of the coating is observed, do not use the instrument.

LLETZ Coated Speculums

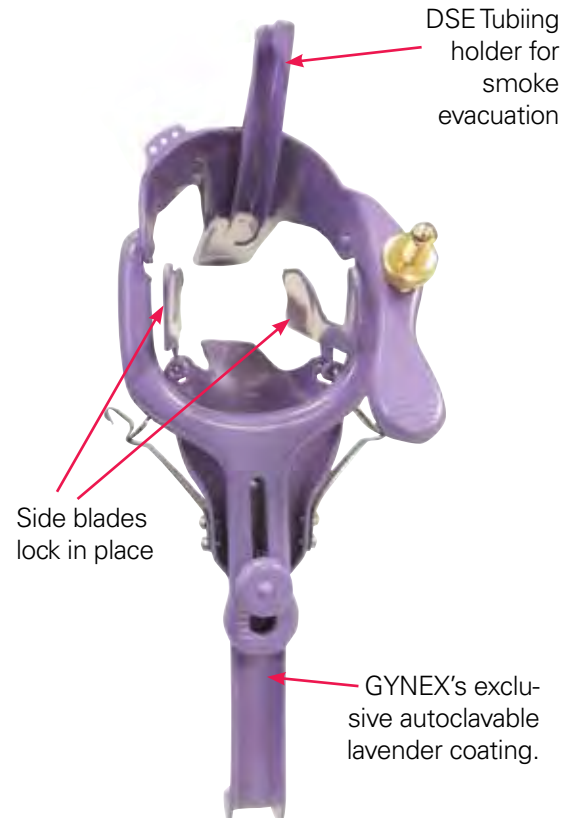

4-Way Expander Vaginal Speculum for LLETZ procedures!

It provides a superior view with one instrument as compared to a standard speculum and the lateral retractor. The built-in side blades are erected on demand to enhance the view of the cervix as needed.

- Unique speculum with built-in lateral retractor blades.
- Side blades lock firmly into place.
- Pederson size blades.
- Designed for LLETZ procedures with Gynex's autoclavable lavender coating.

Greenberg Hysteroscopy Speculum

- The Greenberg Hysteroscopy Speculum is a traditional open-sided Graves speculum with shorter blades.
- Open right side

"The shorter blades bring the external os about 30% closer to the introitus and make access to the cervix dramatically easier in almost every facet of surgical cases in which a speculum is used."

James Greenberg, MD,
Boston, MA

Titanium Rainbow™ Speculums Pederson & Graves

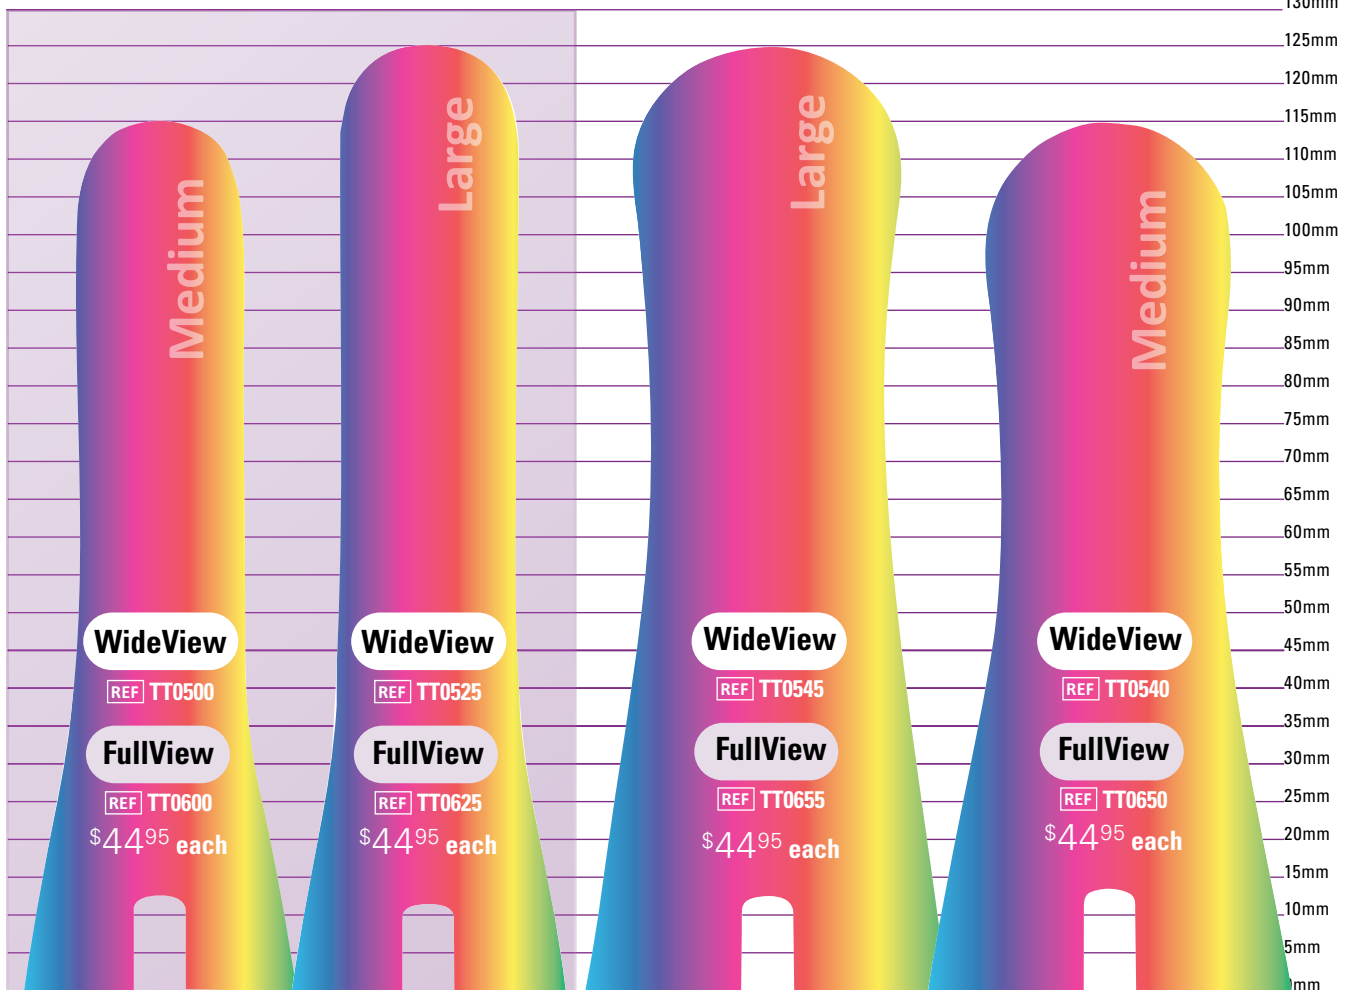

Introducing our Titanium Rainbow line of speculums. This exclusive Titanium Rainbow TiO coating is harder than ordinary stainless steel. Both Pederson's and Graves' are available in two viewing widths: WideView (40mm) and FullView (70mm). Just specify the length (medium or large) when placing your order.

Pederson

Graves

Stainless Open-Sided Speculums

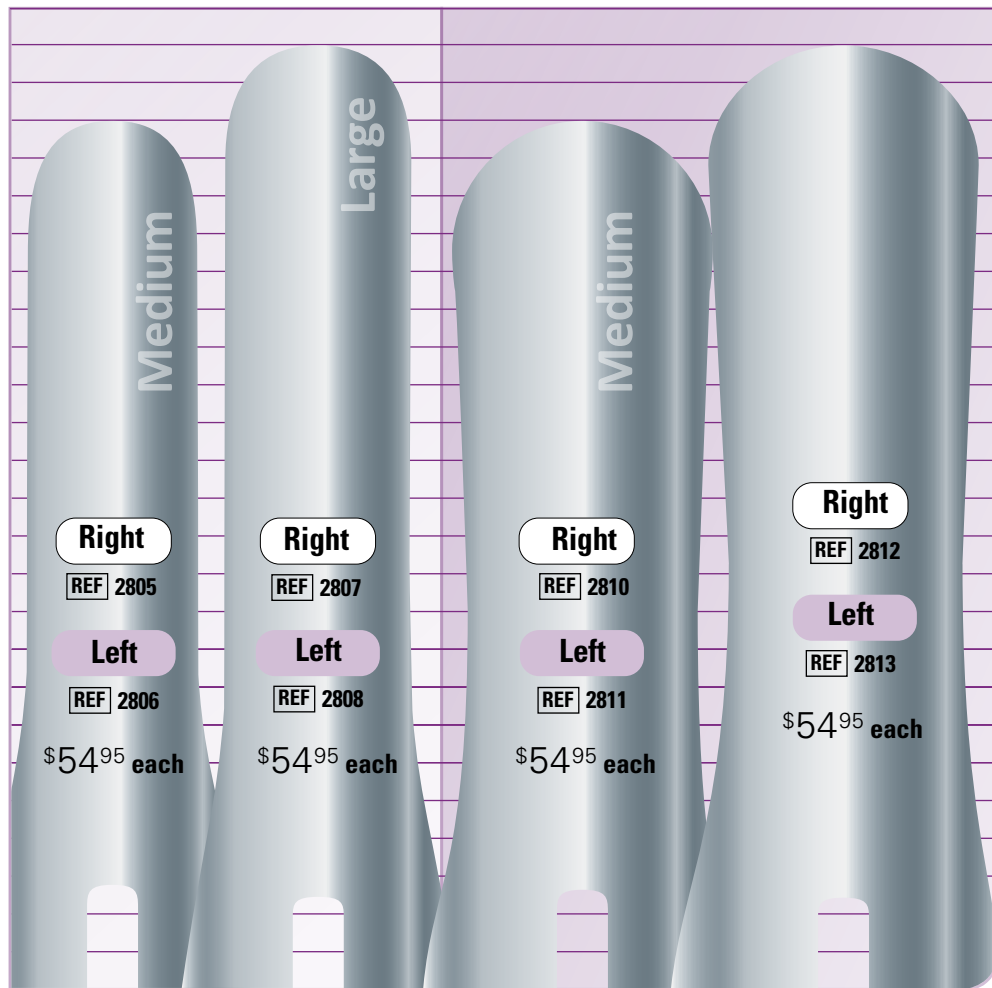

Pederson

Graves

Left or Right Opening

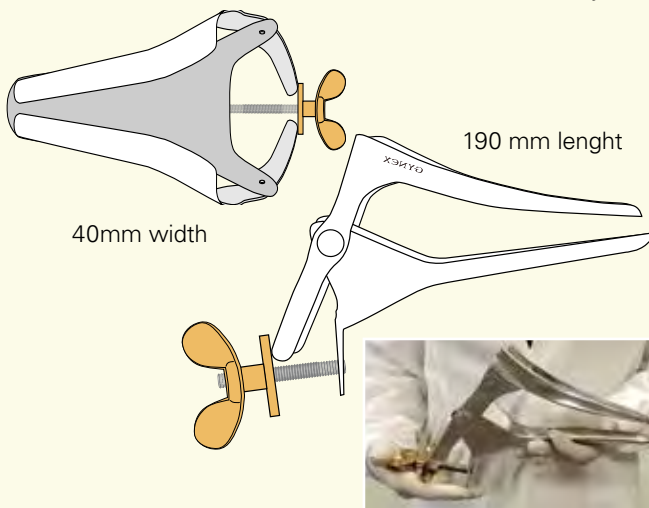

Note: Blade length is measured from top center of back of blade to end of distal tip. In most cases, the bottom speculum blade will protrude and appear to be longer. Mechanical assembly of a speculum simply places the bottom blade in a more forward position. Although the two blades are normally similar in length, they may vary a few millimeters from lot to lot.

BARIATRIC INSTRUMENTS

The Jupiter Speculum™

The solution for your extreme bariatric patients

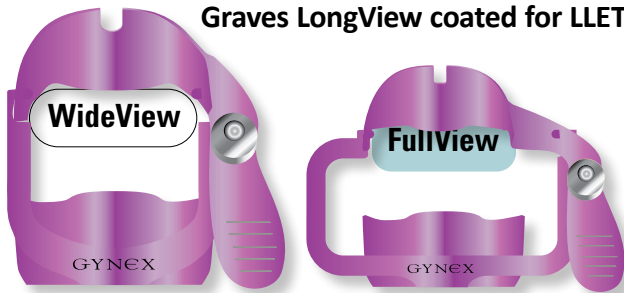

There is a growing demand for physicians to examine very large patients. Access to the cervix can be extremely difficult in these cases. Gynex® is proud to now offer a solution to this difficult situation. As such, we are introducing the Jupiter Speculum™.

Developed by Washington University in St. Louis, this triple extra large stainless steel speculum provides the needed access that even the largest graves speculum cannot provide. The Jupiter Speculum™ may not be needed everyday, but it can be indispensable when the need arises.

Touch-Guard™

INSTRUMENT LUBRICANT AND RUST INHIBITOR

The Only Instrument Lubricant and Rust Inhibitor Clinically Tested to be Thoroughly Steam Penetrable and Steam Sterilizable

Used routinely as part of the Gynex Instrument Care System, Touch-Guard® Instrument Lubricant and Rust Inhibitor will greatly reduce repair and replacement costs. Touch-Guard® Instrument Lubricant and Rust Inhibitor provides permanent lubrication and protection for all surgical instruments.

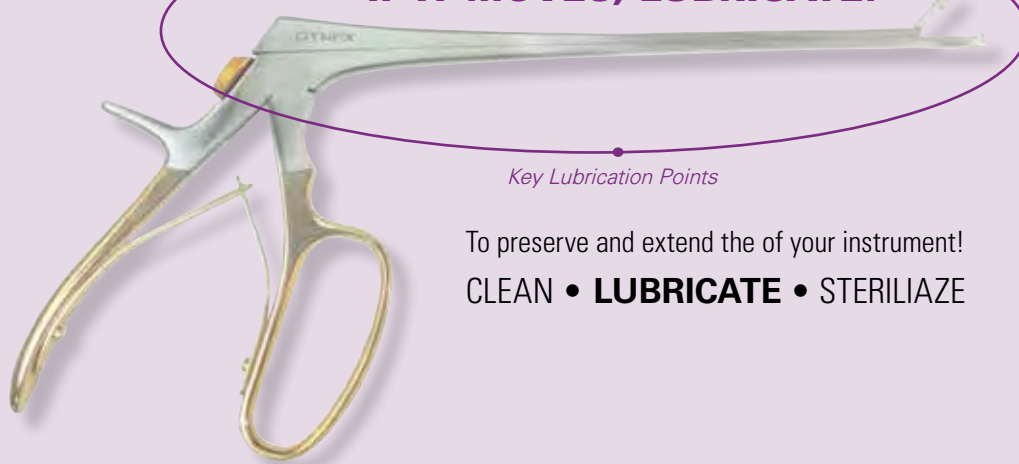

Features

- Withstands the high temperatures of autoclaving
- Restores articulation to sticky box-locks and joints
- Water soluble high-grade mineral oil lubricant and rust inhibitor.
- Prevents rust, spots, stains and corrosion thus prolonging the life of the instrument.
- Prevents damage due to the misuse of stiff or grinding instruments thus reducing repair and replacement costs.
- Steam penetrable, steam sterilizable and ETO sterilizable.
- Non-oily, non-sticky, non-toxic and silicone free.

Stain-Ex™ For Your LLETZ Instruments

Stain-Ex is a specially denatured alcohol solution that removes tough stains from the GYNEX line of LLETZ-Coated instruments (see pages 72–75). A variety of stains including blood and Monsel's can be removed when soaked in Stain-Ex. No hard scrubbing that can damage the coating is needed. Follow the instructions and you can keep your instruments looking as

- Removes blood stains
- Removes Monsel's stains
- Bio degradable and phosphate free

REF SS10 1 Gallon \$85⁹⁵

REPAIRS AND SHARPENING

Gynex® sharpens and repairs most instruments.

All sharpening and repairs also include rust/stain removal, cleaning, minor polishing and lubrication. If the instrument that you would like to have sharpened or repaired is not listed above, or you have any questions, please contact us for more information.

Pricing is as follows:

Gynex brand biopsy punch \$65.00
Non-Gynex brand biopsy punch \$75.00
Gynex brand curette \$40.00
Non-Gynex brand curette \$50.00

**Toll Free: (888) 486-4644
(7:30AM–4:00PM PST)**

Please note that due to metal, age and condition, some instruments may not be repairable or sharpened.

Notifications

Selling Notice:

All products are limited to purchase by licensed medical practitioners, physicians and medical facilities. In most cases, we do not sell to the general public.

Warranty:

All hand-held instruments in this catalog are warranted to be free of defects in manufacturing materials and workmanship for two years from date of purchase. Customers who feel an instrument is defective must return it to GYNEX for evaluation. Products found to be defective will either be repaired or replaced with the same or comparable product, at the discretion of GYNEX Customer Service. Warranty on any hand-held GYNEX instrument is voided if instrument is repaired or sharpened by anyone other than GYNEX. All GYNEX biopsy punches in this catalog will be sharpened free of charge for one year from date of purchase (if enough metal is remaining on tip to allow sharpening). Warranties do not cover general maintenance, cleaning or sharpening needs that result from normal use, except as noted above regarding biopsy punch sharpening. Damages caused by misuse, improper care, cleaning, chemicals, or loss and theft are not covered by this warranty. Shipping charges are not covered for free sharpening warranty nor extended equipment warranty.

Return Policy:

Customer must obtain a Returned Merchandise Authorization (RMA) number from GYNEX customer service at (425) 882-1179. An itemized list of returned products must accompany all returns. Include the Returned Merchandise Authorization (RMA) number and explanation of why the product is being returned. Returned goods MUST be packaged in a shipping container equivalent to that in which it was received. Returned goods MUST be shipped at customer's expense by Parcel Post, Airborne, FedEx or UPS, and must be insured for the purchase price of the contents. Returned goods received by GYNEX in any form less than that described above will be refused by GYNEX and return shipped to the customer.

The following items may be returned:

- Product with RMA number
 - All returns must be made within 30 days of the item receipt (except for warranty).
 - Product with unbroken seals, with labels intact, in original container and packaging
 - Unused instruments which have not been cleaned or sterilized
 - Single-Use[®] product (sterile) in original, unopened package
 - Product damaged in shipment*
 - Product that has at least 12 months remaining shelf life as determined by the expiration date
 - Instruments damaged, broken or not working properly due to defects in material or workmanship
- *Note: Product returned due to error or damage in shipping must be reported to customer service within 72 hours of receipt. Damaged product must be accompanied by a written explanation noting damage.

The following items may not be returned:

- Product without RMA number
- Product that has been improperly handled or stored
- Product that is marked, coded, dated, damaged, soiled or adulterated in any way (except standard cleaning and sterilization procedures for reusable instruments)
- Product damaged by or exposed to heat, fire, smoke, high humidity or water (except standard cleaning and sterilization procedures for reusable instruments)

Restocking Charge:

A 15% restocking charge applies to all returned product, unless the return is due to error in shipment, product damaged in shipment, or product returned for repair or replacement due to defect in material or workmanship.

Disclaimer:

All prices in this catalog are subject to change without notice. All sizes indicated may vary slightly, due to differences between manufacturers. In order to carry sufficient inventory, it is necessary for GYNEX to purchase from different manufacturers. As a result, final products may not be the exact sizes as shown in charts, drawings or photos. The advertisements and in-

formation in this catalog may contain typographical errors or inaccuracies and may not be complete or current. GYNEX therefore reserves the right to correct any errors, inaccuracies, or omissions and change or update information at any time without prior notice. Please note that such errors, inaccuracies, or omissions may relate to pricing or availability. We reserve the right to refuse to honor offers or terms, which contain error or inaccuracies.

Mail Orders To:
GYNEX
P.O. Box 3189
Redmond, WA 98073

Terms: Net 30 Days on open approved accounts. 1.0% finance charge per month shall apply on all past due accounts. International accounts require prepayment. New accounts may require prepayment with first order.

Shipping: FOB Redmond, Washington. Normal shipping via UPS or FedEx Ground, and charges for shipping and handling are added to order total. Expedited delivery (Next Day, 2nd Day, 3rd Day) available for additional charge.

Note: Pre-paid shipping charges of \$14.50, do not apply to Alaska, Hawaii, Puerto Rico, the Virgin Islands and other U.S. Islands, and international orders.

Please Note: A handling fee will apply to orders that use customer's own shipping account.

Please Note: An additional custom fee may apply for the Virgin Islands and other U.S. Islands, and international orders.

Partial Shipments: We reserve the right to make partial shipments against orders and the amounts for such partial shipments will become due and payable upon receipt unless otherwise agreed to in writing by GYNEX.

5% Discounts: Customers may deduct an additional 5% off their total order when payment is made at the time of purchase. This is applicable to orders that are mailed in with a check for payment of the entire order and for credit card orders. COD orders do not qualify for this discount. This discount does not apply to Microscopes, Colposcopes and/or extended warranties and some specials were products are already discounted.

Warranties Returns and Disclaimers: All information concerning these GYNEX policies are detailed on page 98 of this catalog. All customers are requested to read this information.
